

RAP-824 Series Space Saver™ Odor and Particulate Controllers

- ◆ The **NATURAL** way to eliminate odors, dust and pollen without sprays, chemicals, ozone or gimmicks.
- ◆ An industrial strength air scrubber.
- ◆ Removes stray odors that have infiltrated meeting rooms and work spaces.
- ◆ Powerful, compact, safe, quiet and affordable.
- ◆ Selectable air flow control.
- ◆ **electrocorp** air scrubbers have been tested and approved by the Department of Homeland Defense for use by the U.S. Army Corps of Engineers.

Since 1985, **electrocorp** has designed and manufactured industrial air scrubbers for clients such as the U.S. Navy, U.S. Army Corps of Engineers, Boeing, Dupont, and hospitals including Chicago General, Downtown New York Medical Center and Kaiser Permanente. Each **electrocorp** RAP (Radial Air Scrubber) creates a ceiling-to-floor laminar air flow typical of high tech industrial clean rooms for optimal air scrubbing efficiency.

With a diameter of only 8 inches, it is easy to move around and can be strategically placed in any space including office and work areas. The RAP-824 Odor Control Unit has a high efficiency, 12 pound filter media built to last and eliminate the strongest odors. The RAP-824 Particulate Control Unit captures 95% of particulate at .3 microns and up; this includes mold spores, bacteria, dust and pollen. The odor and particulate control filters are interchangeable. You won't find a more effective, compact air scrubber on the market. Both models come with replaceable white pre-filters (not shown).

Air Flow and Mechanical:

Air flow rate - CFM (speed controllable)
Replaceable pre-filter - collects particles
Disposable Inner Filter
