

## RSU CC Series

Air Filters for Industrial Chemical, Gas & Odor Control

Electrocorp's Radial Scrub Unit (RSU) CC series is the simple and affordable solution to industrial and commercial **chemical, gas and odor control**.

The RSU series are freestanding, plug-and-play units, requiring no dedicated electrical installation. Ideal for small businesses to large indoor applications, RSU's are recirculating units engineered to offer high-efficiency air filtration, with a small footprint and low-energy consumption.

## The Carbon Difference

The RSU CC series is designed with a deep carbon bed, and up to 120 pounds of high-grade, activated carbon. Activated carbon is globally recognized as the safest, most effective way to eliminate VOC airborne toxins.

- 2.5" deep carbon beds with activated carbon designed to remove 90% of airborne chemicals, gases and odors
- Special carbon blends available for specific and non-VOC chemicals
- 360° air intake
- No tools required for servicing
- Variable speed; 115 voltage (220 voltage available)
